

November 14, 2006

Dear Friends:

I have been very busy. We moved from Idaho to Eldorado. My eyesight continues to weaken ... it is much worse than it was at this time last year! I seem to have lost some ground! However, we continue to exercise and play golf.

Had a great trip to Pebble Beach – played 84 holes in 5 days – walking at the end and was exhausted! Then played in the Eldorado opening. I'm now a 36 from the forward (ladies') tees!

Before leaving Idaho, we had a Peebler PSP Research Foundation Board meeting. Dr. Golbe and Richard Zyne made the long trip west and Brian Ballard came down from Boise. So far, we have raised \$2.6 million and Toni and I want to thank all who have contributed to our success thus far. After the meeting and report from Dr. Golbe, Toni and I felt that we are having some impact thanks to you all! Thank you all for helping.

In early November, I attended both the Valmont and Meredith Board meetings! Toni has not felt well – due to sinus infections. We celebrated our 27th anniversary on November 12th. I made a vow to Toni that I will try to be here for our 30th!

We will continue to cope with whatever life has in store for us. All of you do the same!

Love you –

Chuck

P.S. If this is the first "update" you have received, please log onto www.PeeblerPSPResearch.org to catch up with past report. Thank you for your interest.
