

June 20, 2005

Dear Friends:

Toni and I are back in Idaho and loving every minute of it. It is different. On June 7<sup>th</sup>, I was having lunch with Al Shoemaker at the Valley Club and it began to snow. It was the first time I've ever had a golf game snowed out!

Our trip to Europe was a success. We met with doctors in London and Paris. They both agreed on one thing ... no one can tell you for sure that you have PSP until you are dead, then an autopsy can determine it. Otherwise, it is a judgment call. It was agreed that I most likely have PSP. Dr. Attias in Paris prescribed a treatment of many, many holistic, non-toxic pills, shots, etc. to build up my immune system. This is to be combined with a healthy diet, lots of rest and exercise, which I'm doing.

It is too soon to determine results; however, I do notice that in comparison to last year, I have declined some! During our trip to Europe, we did visit Lourdes. I may be their next miracle (keep your fingers crossed). Dr. Attias asked that I restrict my travels. As a result, we had to cancel our planned trip to Hawaii.

We have had some good news ... the IRS tells us we now have tax-free status for the Peebler PSP Research Foundation. This report was given to us verbally on June 7<sup>th</sup>. They said a letter would follow. (In government terms, that could mean another two weeks.) As soon as we get the letter, we will forward a copy to all of you with the hope that you would want to make us a regular part of your giving plans.

That's all for now ... you'll hear from me again soon.

All my best.

Yours sincerely,

Charles D. Peebler, Jr.
